

ABSTRACTVIDEO CAMERA

5           A video camera arrangement comprises an image capture device; a face detector for  
detecting human faces in the captured video material and for generating face data identifying  
detected occurrences of faces in the captured video material; a data handling medium by  
which data representing the captured images is transmitted and/or stored; and a processor for  
generating data to be transmitted or stored by the data handling medium in dependence on  
10 the detection of faces in the captured images.
